

Cityscape Gate

High Security

The ATG Access range of security products are built to the highest quality standards and conform to the toughest testing procedures in the World.

Many gate products are industrial in appearance and are inappropriate for use in pedestrianised areas.

The Cityscape gate is stylish, smooth lined and pedestrian friendly as well as being immensely strong having been successfully tested at PAS 68 level, arresting a 7500kg truck travelling at 40mph and is a valuable addition to our proven high security product range.

It is installed with a minimum of disruption using our shallow mount technology and is light in weight for a product of its type; this is achieved through the use of synthetic materials and state of the art design.

The Cityscape gate is available in brushed Stainless Steel or coated finishes and can span 4m to 5.5m, it may be specified as right or left hand hinging and may be opened in either direction, it is secured by a hydraulic locking mechanism and it may therefore be unlocked remotely from your central control room.

Benefits:

- Ease of installation
- Cost effective installation (up to 70% less concrete)
- Blends seamlessly with traditional street furniture
- Lightweight but extremely strong

ATG ACCESS LTD

Technical Data

There is an SP product to match every level of security

Product	British Rating	Vehicle Weight (tonne)	Vehicle Speed (kph)	American Rating	Vehicle Weight (lbs)	Vehicle Speed (mph)	Product Height/ Diameter(mm)
