

# PROTECTING ALFRESCO SPACES

Leda bollards, planter boxes, seatings & street furniture protecting alfresco dining & cafe areas

Designed &  
Manufactured by

## PAS170 Bollards

## Bollard Bike Hoops

## Street Furniture

When we talk about protecting crowded places, alfresco dining and cafe areas around the country are undoubtedly in the list of locations to be protected. Leda being a leader in physical security & hostile vehicle mitigation has been at the forefront of securing council properties & alfresco spaces for many years, with aesthetically attractive bollards and street furniture protecting people and assets from accidents and vehicle attacks. We have installed a range of **impact rated & engineered bollards, bollard bike hoops, logs, seating and street furniture** for a number of councils in Australia.

Our **PAS170 crash tested bollards** can stop a **2.5t vehicle at 16 or 32km/hr** & is an ideal solution in areas where pedestrians & vehicles are in close proximity. Crash tested as a single bollard it can be dressed with an aesthetically attractive sleeve making it part of street landscape & framework.
